Portfolio: <https://nandysundram.github.io/>

CAREER SUMMARY

- Dedicated AWS Cloud Engineer with over **4.7+ years** of professional experience in AWS & Oracle cloud, with expertise in Terraform and cloud-native solutions.
- Proven track record of managing production environments, implementing automation solutions for end-to-end infrastructure deployment, cost optimizing infrastructure, and ensuring the highest level of availability and security.
- Hands-on experience with the Temenos Banking Product (Fusion), including EKS cluster management, Karpenter autoscaling, Strimzi Kafka integration, monitoring setup, and infrastructure cost optimization.
- Built AI-driven applications using **AWS Bedrock**, designing and deploying agent-based solutions on AWS infrastructure.
- Experience with **AWS Kiro** for streamlined cloud infrastructure development workflows.
- Exceptional communication, analytical, troubleshooting and presentation skills exhibited in Client Meetings.

WORK EXPERIENCE

BAHWAN CYBERTEK

AWS Cloud Engineer | Jan 2025 – Present (11 Months)

- Managing EKS clusters for **Temenos Fusion** banking workloads (COB, App, API, Web, Infra node groups) with **Karpenter**-based autoscaling.
- Integrated **Strimzi Kafka** with Temenos Transact services and configured Java-based bootstrap connectivity.
- Led CloudWatch cost optimization — identified \$8,833/month log spike, migrated to Fluent Bit → S3/Loki achieving **~95% reduction** in logging costs.
- Set up full observability stack: **Prometheus**, Alertmanager, Grafana, and Loki; implemented **KEDA**-based autoscaling for Temenos batch services.
- Designed and deployed an AI agent-driven application using **AWS Bedrock**, leveraging foundation models and agent orchestration frameworks for business automation.
- Utilized **AWS Kiro** for accelerated cloud infrastructure development and deployment workflows.
- Produced infrastructure sizing documents, CY vs TY cost estimates, and UAT upgrade cost analysis for Temenos workloads.
- Resolved complex **SCP** and **IAM** permission issues across AWS Organizations for EKS node group provisioning and ECR access.
- Troubleshoot and resolved EKS node AMI version mismatches, OOMKilled pod issues, and node rebalancing events.

ASPIRE SYSTEMS

Cloud-Ops Engineer | Nov 2021 – Dec 2024 (3 Years 8 Months)

- Provisioned AWS cloud infrastructure for multiple projects ensuring **99.99% uptime**.
- Utilized **Terraform** for infrastructure as code (IaC), enabling consistent and reproducible deployments.
- Created and maintained CI/CD pipelines in AWS CodePipeline for continuous integration and deployment of applications, **reducing 30% of manual work**.
- Collaborated with cross-functional teams to design and implement high-availability architectures, disaster recovery plans, and cost optimization strategies using reserved instances.
- Automated routine tasks using **Bash** and **Python** scripts for operational efficiency.
- Implemented **CloudWatch** and **Site24x7** for proactive monitoring and issue resolution.
- Conducted regular vulnerability assessments, security updates and Patch Management for various Operating Systems including **RHEL**, **Ubuntu**, and **Windows**.
- Strengthened security with **IAM policies**, security group configurations, and **GuardDuty** remediation.

- Configured AWS services including VPC, EC2, RDS, S3, ElastiCache, AWS Backup, SNS, SQS, ECS, ECR, ALB/ELB, ASG, CodeCommit, CodeBuild, CodeDeploy, Lambda, API Gateway, Security Hub, GuardDuty, AWS Batch, and CodePipeline.
- Designed and implemented high-availability architectures, Disaster Recovery Plans, Business Continuity Plans (BCP), and cost optimization strategies.
- Documented best practices, standard operating procedures, and infrastructure diagrams to facilitate knowledge sharing.

PROJECTS

Temenos Banking Platform — Bahwan Cybertek (Cloud Engineer)

- Provisioned and managed EKS clusters for Temenos Fusion (COB, App, API, Web, Infra node groups) with Karpenter autoscaling.
- Integrated Strimzi Kafka with Temenos Transact services; configured Java-based bootstrap connectivity.
- Led CloudWatch cost optimization — identified \$8,833/month log spike; migrated to Fluent Bit → S3/Loki stack saving ~95% on logging costs.
- Set up Prometheus, Alertmanager, Grafana, and Loki full observability stack; implemented KEDA-based autoscaling for batch services.
- Produced infrastructure sizing documents, CY vs TY cost estimates, and UAT upgrade cost analysis.

AI Agent-Driven Application — Bahwan Cybertek (AWS Bedrock)

- Designed and built an AI agent-driven application using AWS Bedrock, leveraging foundation models and agent orchestration frameworks.
- Provisioned supporting AWS infrastructure including API Gateway, Lambda, and IAM roles for the AI application.
- Implemented end-to-end automation workflows driven by the Bedrock agent, reducing manual intervention in business processes.

Aviation Sector Project — Aspire Systems (Cloud Engineer)

- Automated end-to-end environment provisioning through Terraform.
- Configured ECS for hosting applications along with API Gateway; implemented DR setup and performed Region-to-Region Switchover within RTO & RPO.
- Configured AWS Batch for large processing units; enabled AWS WAF, Security Hub, CloudTrail, and Config.
- Configured AWS Client VPN & OpenVPN; worked with Azure AD for user access and license management.
- Automated full & incremental backups on daily, weekly, and monthly basis using AWS Backup.

E-Commerce Sector — Aspire Systems (Cloud Engineer)

- Configured CI/CD pipeline using AWS CodeCommit, CodeBuild, and CodeDeploy; proficiently utilized Terraform modules.
- Implemented containerized tools including ECS, Fargate, and ECR; configured Lambda, Systems Manager, S3, Aurora & Postgres RDS.
- Specialized in IAM and SSO configuration & administration; configured Jenkins pipeline for syncing CodeCommit and Git.

SKILLS

Cloud: AWS (Primary), Oracle Cloud, Azure (Fundamentals)

AI / GenAI: AWS Bedrock (Agent development, Foundation Models)

Banking Platform: Temenos Fusion (EKS infra, Karpenter, Kafka, KEDA autoscaling)

IaC & Automation: Terraform, AWS Kiro, Bash, PowerShell, Python

Containers & Orchestration: EKS, ECS, Fargate, ECR, Karpenter, KEDA, Strimzi Kafka

CI/CD: AWS CodePipeline, Jenkins, CodeCommit, CodeBuild, CodeDeploy

Monitoring & Observability: CloudWatch, Prometheus, Grafana, Loki, Fluent Bit, Site24x7, New Relic, CheckMK

Security: IAM, GuardDuty, Security Hub, Inspector, AWS WAF, CloudTrail

Databases: MySQL, PostgreSQL, Aurora RDS

Operating Systems: Linux (RHEL, Ubuntu, Amazon Linux), Windows

Version Control: Git, AWS CodeCommit

ITSM: Jira, Freshservice

CERTIFICATIONS

- Azure Fundamentals (Microsoft Certified)
- Oracle Cloud Infrastructure Foundations Associate

EDUCATION

B.Tech – Information Technology | KSR Institute of Engineering and Technology | 2017–2021 | 7.85
CGPA
HSC: 82% | SSC: 92%

ACHIEVEMENTS

- Received Role Star Award for Financial Year 2023–2024 from Aspire Systems.
- Received client appreciation for cost optimization activity and executing BCP activity for critical business processes.
- Received an appreciation for continuous support and AI – Application development from BCT.
